

Howard County Beekeepers Available Outyards

(As of 12/23/23)

Status	Property City	Property Zip Code	Property County	Land Size (Acres)	Max Hive Number	Location Description	Hive Reasoning	Hive Access	Notes
Available Outyard	Columbia	21045	Howard	0.25	2	We have a backyard that backs up to bushes and then a baseball field. I assume we could house a hive in the back corner of our lot.	It's important to us that our 3 boys learn about our local ecosystem and the interconnectedness of plants and bees!	They could come in our fence (to be built soon!) and get right to the bees.	We have 3 chickens and 2 dogs.
Available Outyard	Columbia	21044	Howard	0.5	4	Open back yard. Stream runs by property. Easy access from driveway to the back yard.	Interested in helping the honey bee population and providing pollinators to help pollinate apple trees on property.		
Available Outyard	Ellicott City	21042	Howard	1	2	The back yard is fenced in to prevent deer and other wild animals from spoiling the fun, and access is easy through a gate at the end of the driveway leading into the back yard.	I have planted fruit trees and a grape vineyard in my back yard, along with re-establishing vegetables and flower gardens, and I understand that bees are in trouble, so want to help!	Easy access through an open back yard.	Happy to get started next season.
Available Outyard	Glenwood	21738	Howard	3.5	3	There are several options in our yard for bees to be located			
Available Outyard	Glenwood	21738	Howard	6	10	Looking to add behives. Behind Glenelg High School. Trees nearby and water access.		No access issues.	
Available Outyard	Hanover	21076	Howard	0.25	2	There is open space behind our shed (12 X 20) that gets no foot traffic and is surrounded by woods on 2 sides. I feel it would be a great spot where they wouldn't be bothered and could thrive. I have no concept of how many hives could utilize the space.	I have open space behind my house and woods. There will be no building because I also have railroad behind. I am aware of the importance of honey bees for our environment and would like to contribute in some way. I do not have the time nor energy to be a Bee Keeper myself.	There is a 10x27; easement between my house and my neighbor's that the Bee Keeper could walk down and get to the space. He can also go through our yard. WE have no fence.	
Available Outyard	Highland	20777	Howard	5	5	Creek near by.	HCBA beekeeper would like to share her property to a beekeeper that needs space.	No access issues.	
Available Outyard	Marriottsville	21104	Howard	5	4	Open areas in back of property. Several location options for hives. Area is located in wooded area with plenty of trees.	Property owner enrolled in Beginning Bee Class. Interested in helping beekeeper to learn.	Open back yard.	
Available Outyard	Woodbine	21797	Howard	3	10	Property located next to a tree farm. Plenty of room for hives.	Would like to help honey bees by providing a place to maintain hives.	No access issues.	
Available Outyard	Woodbine	21797	Howard	4	5	Small farm with adequate room for hives.	Very interested in beekeeping. Would like a beekeeper who is willing to educate.	No access issues.

Available Outyard	Woodstock	21163	Baltimore	4	8	I'm in Balt County but right near the HoCo part of Woodstock Maryland. My property is partially wooded at the edges but has a flat/grass area near the road with several streams/springs. You could put the bees wherever you'd like.	I took your beekeeper course a few years ago and loved it. I moved recently and don't have the time/money to keep my own bees (I've got chickens/ducks/geese). I'd still love to host bees and enjoy them.	Depending on where you put them, you could drive right to them (if you've got a car that can drive on grass - it can get muddy!) Or park on the parking pad and walk to them. I've got a little cart and would be happy to help set up or share tools with you.
